PREFACE

The Service Delivery Area Annual Planning Information Reports are published by the Kentucky Cabinet for Human Resources, Department for Employment Services. They are designed to satisfy information needs generated by the Job Training Partnership Act of 1982.

Ben Huelsman of the State and Local Planning Unit contributed to these reports. The work of Barbara Tipton and Kim Kain, who typed the report, is greatly appreciated. Robert Barnes, also of the State and Local Planning Unit, drafted this report under the direction of Earl Turley. Any questions, comments, or suggestions should be directed to Robert Barnes or Earl Turley, Department for Employment Services, Research and Statistics Branch, CHR Building--2nd Floor East, 275 East Main Street, Frankfort, Kentucky, 40621, (502)564-7976.

Job Training Partnership Act of 1982

The purpose of the Job Training Partnership Act (JTPA) of 1982 is to establish programs to prepare youth and unskilled adults for entry into the labor force and to afford job training to those economically disadvantaged adults and other individuals facing serious barriers to employment who are in special need of such training to obtain productive employment.

Programs have been established under JTPA to provide remedial education, job training and other employment services. Under JTPA there are a number of target groups that are of primary interest to planners. JTPA is also aimed to providing assistance and retraining to present participants of the labor force whose jobs have been or are expected to be jeopardized by job market shifts from being a manufacturing dominant society to a service and information intensive one.

JTPA, while a federal program, is administered at the state and local levels of government. Several of the responsibilities of the Act are required to executed at the state and local level. Under JTPA, Service Delivery Areas (SDAs) were created. SDAs are regions within the state where job training programs are implemented and local area employment and training planning are accomplished.

The agency established in the Act to formulate and implement objectives and goals is a Private Industry Council (PIC). A PIC is established within each SDA and is a consortium of persons from various sectors of both the private and public economic markets. A majority of PIC members are chosen from the private sector.

Even though the PIC in each SDA is empowered with policy and oversight responsibilities, it is the governor of the state who has the approval authority over locally developed plans and responsibility for monitoring local program compliance.

The need for reliable and accurate labor market information is stated in Sections 125, 461, through 465. The purpose of these Service Delivery Area reports is to provide data and information that will fulfill as best as possible those stated objectives of the Act.

These reports contain a wide range of demographic, labor market, educational and socio-economic data that will be useful to planners and other users in the upcoming program year.

Kentucky and Service Delivery Area Population Highlights

* Kentucky's total population stood at 3,779,717 persons in 1986, 3.2 percent more than in 1980.

* The 16-21 year old age group accounted for 10.2 percent of the population. The 22-54 and 55 years and older age groups claimed respective shares of 44.6 and 21.2 percent.

* Women comprised 51.2 percent of the state's population and nonwhites, 8.1 percent.

* The most populous of the nine Service Delivery Areas in 1986 was the Jefferson County SDA with 683,582 persons. The least populous was the North Central Kentucky SDA with 128,109 persons.

* From 1980 to 1986, the Cumberlands SDA exhibited the strongest population growth with a gain of 7.1 percent.

* The only two Service Delivery Areas to lose population during the period were the Purchase/Pennyrile and Jefferson County SDAs, which had respective losses of 0.4 and 0.2 percent.

* The Jefferson County SDA had the largest proportional nonwhite population at 18.7 percent. The EKCEP SDA held the smallest proportional nonwhite population at 1.2 percent.

Area Development District Population Highlights

* The most populous of the fifteen Area Development Districts in 1986 was the KIPDA ADD (Kentucky portion only) at 811,691 persons. The least populous was the Buffalo Trace ADD at 54,730.

* The fastest growing of the Area Development Districts between 1980 and 1986 was the Barren River ADD with a population gain of 9.2 percent.

* The only two ADDs to experience population declines for the period were the Purchase and Pennyrile ADDs with respective losses of 0.3 and 0.5 percent.

* The KIPDA ADD held the largest proportional nonwhite population at 16.5 percent. The Big Sandy ADD had the lowest proportional nonwhite population at 0.5 percent.

Employment Services Local Offices Population Highlights

* The most populous of the Employment Services Local Offices in 1986 was the Louisville Local Office at 811,691 persons. The least populous was the Middlesboro Local Office with 34,595 persons.

* Between 1980 and 1986, the fastest growing of the Local Offices was the Bowling Green Local Office with a growth in population of 11.0 percent.

* The only two Local Offices to lose population during this period were the Hopkinsville and Mayfield Local Offices with respective losses of 1.6 and 1.7 percent.

* The Hopkinsville Local Office had the largest proportional nonwhite population within its boundaries at 22.3 percent. The Prestonsburg Local Office had the smallest proportional nonwhite population within its boundaries at 0.4 percent.

LABOR FORCE

The labor force consists of all persons in the noninstitutional population over 16 years of age who were either employed or unemployed, including members of the Armed Forces. To be counted as employed, one must (a) have worked for pay or profit during the survey week, or (b) have been temporarily absent from a job which he or she would return. To be counted as unemployed, one must (a) have no job, (b) be available for work, and (c) be actively seeking work. The unemployment is calculated by dividing the unemployed by the labor force. The labor force in simple formula force is:

$$\text{Total Labor Force} = \text{Total Employed} + \text{Total Unemployed}$$

$$\text{Unemployment Rate} = \frac{\text{Total Unemployed}}{\text{Total Labor Force}}$$

There are two terms the user of this report should become familiar with, 'not in the labor force' and discouraged workers. 'Not in the labor force' includes persons who did not work or actively seek employment within a specified time period. Examples of persons 'not in the labor force' include housewives (over fifty percent), students going to school (over ten percent), disabled persons unable to work (less than five percent), and the rest were scattered among volunteers, some seasonal workers, persons doing only incidental unpaid family work, and discouraged workers. Discouraged workers are one of the target population groups covered by the Job Training Partnership Act of 1982 and as such is of special interest. A discouraged worker is briefly defined as someone who does not have a job and has not been actively looking for work during the past four weeks.

Kentucky Labor Force Highlights

* Kentucky's civilian labor force increased by 27,000 workers from 1980 to 1986, an increase of 1.6 percent.

* The 1986 unemployment rate was recorded at 9.3 percent, 1.3 percentage points higher than in 1980, but one-fifth of a percentage point lower than the previous year.

* The 1986 unemployment rate was three-tenths of a percent lower for men than women, and 7.3 percentage points lower for whites than blacks.

* Youth, 16-19 years old, suffered an unemployment rate 10.9 percentage points higher than the rate of the general civilian labor force.

* From 1985 to 1986, unemployment rates for women, blacks and youth fell more sharply than for the general civilian labor force population.

* The civilian labor force participation rate was 61.3 percent for the state in 1986, four-fifths of a percentage point lower than in 1985.

* The civilian labor force participation rate was 25.8 percentage points higher for males than females, and 7.7 percentage points higher for the general population than for nonwhites.

SOURCE: "Kentucky Total and Nonwhite Population and Labor Force Data by County", November, 1986, Department for Employment Services, Research and Statistics Branch, Labor Area Unemployment Statistics Unit.

Unemployment Insurance Covered Employment Highlights

* The U.I. covered employment data are derived for the ES-202 program which most employers are required to comply with by law. Agricultural workers, proprietors, self-employed workers, unpaid volunteer or family workers, and domestic workers in households are some of the employment groups excluded from U.I. coverage.

* From 1980 to 1986, total covered employment in the state has increased by 71,463 workers, a gain of 6.4 percent.

* Of the four major covered employment groups highlighted in the section, manufacturing employment was the only category to suffer a decline over the 1980-1986 period.

* Services employment experienced significantly higher growth than the other three groups for the period.

* The highest average weekly wage paid to U.I. covered workers was $576.84 in mining and quarrying. The lowest wage was $227.12 in wholesale and retail trade. The average for all industries was $330.52

Employment, Hours and Earnings Highlights

* Total nonagricultural employment in 1986 had risen by 40.3 percent from 1970, and by 5.5 percent from 1980.

* Manufacturing employment in 1986 has declined by 0.8 percent from 1970, and by 8.3 percent from 1980.

* In 1986, nonmanufacturing had risen by 56.3 percent from 1970, and by 9.6 percent from 1980.

* Of the manufacturing categories, only textiles and apparel, paper and publishing, and transportation had registered increases in employment since 1980. Of these three, transportation experienced the largest percentage increase at 29.1 percent.

* Of the nonmanufacturing categories, wholesale and retail trade, finance, insurance and real estate, services, and government all experienced increases in employment since 1980. Of these categories, services, followed closely by retail trade, had the greatest growth with respective rates of 23.2 and 20.4 percent.

* In 1986, average weekly earnings in the manufacturing industries had increased by $176.35 since 1977. The average workweek had risen by 3.4 hours, and average hourly earnings had risen by $4.03.

* Average weekly earnings for nondurable goods in 1986, had risen by $149.21 over 1977. The average workweek had risen by 2.7 hours, and average hourly earnings were up $3.54.

* In 1986, average weekly earnings in durable goods had risen by $201.20 over 1977. The average workweek had increased by four hours, and average hourly earnings were up by $4.45.

* The Consumer Price Index, based on a benchmark year of 1967=100.0, stood at 328.4 for 1986. The first eleven months of 1987 revealed a continuous rise in the index.

Occupation Section

This section is comprised of five separate tables which depict various aspects of Kentucky's occupational categories. The "High Demand" and "Fastest Growing" occupational tables highlight those job categories which indicate employment opportunities and expansion. The vertical and horizontal percentages tables combine occupational categories into four broad groupings which provide a perspective on the relative concentration of industry in both the Area Development Districts and the state. The major occupational groups of employed persons table breaks the labor field into ten job categories for the state, SDAs and ADDs.

Of the four broad occupation groupings, Kentucky was more white collar than blue collar. Services comprised the third largest of these groups, and farming was a distant last. Among the ten major occupational groups of employed persons, clerical workers was the largest in the Commonwealth with 233,068 employees. Following closely behind were professional and technical workers, and service workers. Farmers and farm workers made up the smallest of these groups.

Education Highlights

* According to 1980 Census data, 53.1 percent of all Kentuckians aged 25 and older had at least a high school education. This was among the lowest percentages in the nation.

* The Census also reported that over thirty percent of all Kentuckians had no more than an eighth grade education.

* Only a little over ten percent of all Kentuckians aged 25 years and older had completed four years of college education in 1980.

* The 1980 Census also reported that the median of years of school completed for adults 25 and older, was 12.1.

* Of the state's 1985-1986 public school enrollment, 34.8 percent were economically disadvantaged. Of the nine Service Delivery Areas, the EKCEP SDA had the highest percentage of economically disadvantaged students at 52.1 percent.

* Of the 1985-1986 public school enrollment in grades 7-12, 3.75 percent had dropped out by the end of the school year. The Jefferson County SDA had the highest proportion of dropouts for this group at 5.18 percent.

* There were 13,752 GEDs issued in Kentucky in 1986.

Economically Disadvantaged

The Office of Management and Budget (OMB) in Washington regularly issues poverty level guidelines to be used in determining whether individuals meet the economically disadvantaged criteria of the Job Training Partnership Act (JTPA). There are actually two guideline tables, one metropolitan and one non-metropolitan, comprised of different Service Delivery Areas within the state.

Section 4(8) of JTPA defines the term "economically disadvantaged." Among other things, the term means an individual who is a member of a family that had received a total family income for the 6-month period prior to application for the program involved that, in relation to family size, was not in excess of the higher of the poverty level determined in accordance with the criteria established by the Director of the Office of Management and Budget (OMB) or 70 percent of the Lower Living Standard Income Level.

METROPOLITAN TABLE
The 1986 70% of
Lower Living Standard Eligibility Income Level

Family Size	Metro Area
1	5,500*
2	7,400*
3	9,700
4	11,980
5	14,140
6	16,530

For each additional member add: 2,390

This metropolitan table is to be used when certifying applicants from the following Service Delivery Areas: Purchase/Pennyrile SDA, TRI-ADD SDA, Louisville/Jefferson County SDA, North Central Kentucky SDA, Northern Kentucky SDA, TENCO SDA, Bluegrass SDA.

NON-METROPOLITAN TABLE
The 1986 70% of
Lower Living Standard Eligibility Income Level

Family Size	Non-Metro Area
1	5,500*
2	7,400*
3	9,300*
4	11,240
5	13,260
6	15,510

For each additional member add: 2,250

This non-metropolitan table is to be used when certifying applicants from the following Service Delivery Areas: Cumberlands SDA, EKCEP SDA.

* OMB Poverty Level (1987)

CINCINNATI, OHIO SMSA TABLE
The 1986 70% of
Lower Living Standard Income Level (corrected)

Family Size	Metro Area
1	5,500*
2	7,580
3	10,400
4	12,840
5	15,150
6	17,720

For each additional member add: 2,570

This metropolitan table is to be used when certifying applicants for the Northern Kentucky SDA.
